

DARK SILVER PIANO

This piano with its deep black lacquer finish and wide chrome inlay detail running around its case demonstrates a modernity and elegance that set it apart from the traditional ranges by classical manufacturers.

The changes made here are subtle and understated for seamless integration of the instrument in sophisticated, modern, luxurious and innovative interiors.

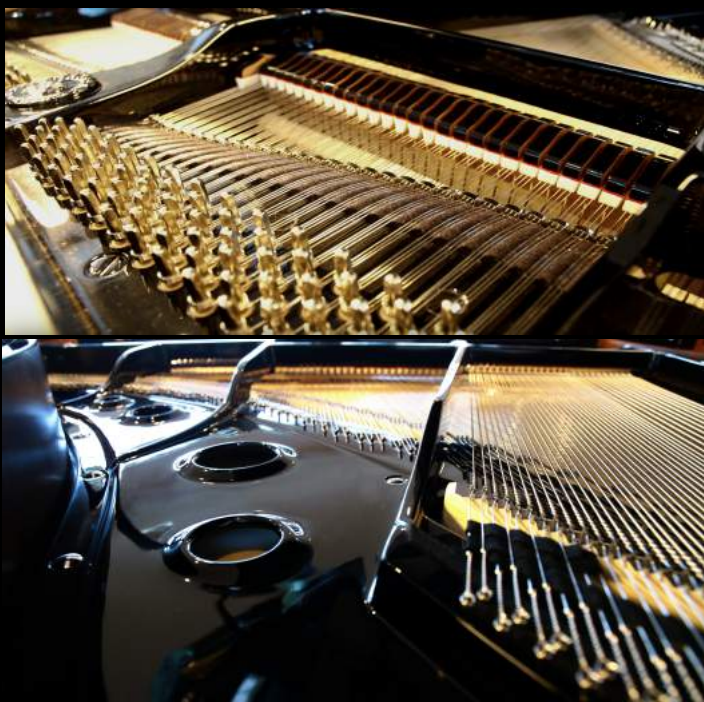

Using a Yamaha instrument as a base template means that this particular piano is exceptionally reliable.

Our teams have been delighted to express their creativity and give this now unique model its own distinctive character.
